

SekChek News – January 2012

SekChek Classic Tool

[SekChek Classic](#) provides an easy-to-read collection of exception reports and an overall rating of security.

Recent enhancements:

- [A fresh, new look for SekChek's reports](#)
- [Tailored benchmarking graphs in report section summaries](#)
- [One and two year analyses for password changes, last logons and account creation dates](#)
- [More accurate last logon times for domain accounts](#)
- [A feature that helps you keep the SekChek software current and up-to-date](#)
- [AS/400: A new report section containing system configuration data](#)
- Active Directory: Reporting on Password Setting Objects
- [New pie charts in 'Answers to Common Questions'](#)
- [More precise percentage values in the charts and report text](#)

SekChek Local Tool

[SekChek Local](#) scans Active Directory domains and Windows servers over the network. The tool processes scan data locally on your PC, so you do not have to send data off-site for processing.

Recent enhancements:

- [One and two year analyses for password changes, last logons and account creation dates](#)
- [More accurate last logon times for domain accounts](#)
- [A feature that helps you keep the SekChek software current and up-to-date](#)

www.SekChek.com

We freshened the content and added new pages:

- A support menu: [How to install SekChek](#), [How to run a scan](#), [How to encrypt your Scan file](#)
- [Tips for managing your SekChek account](#)
- [More FAQs with solutions to common problems](#)
- [More informative, richer product pages with improved links to related information](#)

Future Plans: 1H 2012

We will release new versions of SekChek Classic and Local:

- A face-lift / new GUI for SekChek Classic
- Easier software updates
- Reduced Scan times
- New digital certificates
- PC Auditor will cater for non-western languages

Library of Security Tools

We extended [SekChek's library of embedded security tools](#), which now includes:

- [PC Auditor](#)
- [Windows Firewall Auditor](#)
- [List Missing Windows Updates](#)
- [List Installed Products](#)
- [Search Event Logs](#)
- [Query Active Directory](#)
- [SekCrypt File Encryption](#)
- [List Access Permissions](#)
- [Sid Resolver](#)
- [Orphaned Sid Locator](#)
- [List Open Files](#)
- [File Hasher](#)

We are always looking for ideas that make SekChek more useful to you. If you have a tool in mind, please let us know so we can consider it for development!
